

• [REDACTED] **Exide Technologies:** In 2014 EPA issued a Notice of Violation to Exide for excessive lead emissions. EPA's investigation, prompted by community concerns and ongoing investigations by state and local agencies, found that Exide violated federally enforceable lead emissions standards more than 30 times since September 2013. In August 2014, Exide received a federal grand jury subpoena seeking documents related to air emissions and materials transportation. EPA is working closely with state and local agencies to resolve compliance issues and address community health concerns, and the facility remains closed until it meets Air District requirements. Settlement negotiations are ongoing with Exide. [REDACTED]
